SUMMARY

Highly skilled DevOps Engineer with over 3+years of experience in architecting and managing robust cloud infrastructure. Proven ability to enhance efficiency through CI/CD pipeline implementation, achieving a 40% increase in deployment frequency, and optimize service availability to 99.9% using Kubernetes. Adept at automating infrastructure provisioning with Terraform, improving consistency by 70%. Eager to leverage expertise in cloud security, monitoring, and containerization to drive operational excellence for your organisation.

WORK EXPERIENCE

11/2023 – 04/2026

DevOps Engineer , Canada(Remote)

Rent Nexus International

- Architected and provisioned AWS infrastructure utilizing Terraform for multi-environment deployments (dev/staging/prod), enhancing infrastructure consistency and reducing manual provisioning effort by 70%
- Designed and implemented CI/CD pipelines with Jenkins and GitHub Actions, augmenting deployment frequency and accelerating delivery speed by 40%
- Containerised and deployed over 15 microservices onto Kubernetes clusters managed by Rancher, achieving a service availability of 99.9%
- Established role-based access control (RBAC) and IAM policies in adherence to least-privilege principles, fortifying the cloud security posture
- Integrated SonarQube and Nexus to facilitate automated code quality checks and artifact lifecycle management
- Constructed Prometheus and Grafana monitoring dashboards, decreasing incident detection and response times by 30%
- Secured sensitive configurations using Ansible Vault, ensuring alignment with security best practices and compliance requirements

03/2022 – 09/2023

AWS DevOps Engineer , Canada

Liontech Solutions

- Developed standardised, reusable Terraform modules to streamline AWS infrastructure provisioning across diverse projects
- Built and maintained robust CI/CD pipelines spanning both AWS and Azure environments, thereby improving deployment reliability
- Deployed and managed containerised applications using Docker and Kubernetes, underpinning a scalable microservices architecture
- Implemented comprehensive IAM policies and secure access controls to mitigate risk exposure
- Designed and deployed advanced monitoring solutions leveraging Prometheus and Grafana for critical production workloads
- Collaborated closely with development teams to optimise release cycles and significantly reduce deployment failures

EDUCATION

08/2024 – Present
Kesmonds University International
Diploma, DevOps & Cloud Computing Engineering

2010 – 2013
University of Buea
Bachelor’s Degree

SKILLS

AWS	EC2
S3	VPC
IAM	RDS
ALB	Aws code commit
Aws Amplify	Terraform
Ansible	Docker
Kubernetes	Rancher
Helm	Jenkins
GitHub Actions	ArgoCD
Prometheus	Grafana
RBAC	Secrets Management
Ansible Vault	Maven
Nexus	SonarQube
Bash	Linux
Ubuntu	CentOS
Git	GitHub

LANGUAGES

English (Fluent)

French (Intermediate)
